Innovative Techniques in Spinal Trauma Surgery (TRAUMA)

March 17,18 2016
Leiden , The Netherlands

**MICHELSON
TECHNOLOGY
AT WORK**

Course Objective

An introduction into the various posterior and anterior options available to treat trauma of the entire spine.

The course is designed to give participants the tools they need to decide the best surgical solution for patients with spinal trauma through lectures, case discussions and an anatomic workshop.

Chairman

Prof V. Vougioukas (Greece)

Faculty

Dr G Bordon (Spain)
Dr Trana (Norway)

Agenda

Thursday, March 17th, 2016

12:00	Faculty meeting	
12:30	Lunch	
13:30	Welcome and introduction	
	Cervical Pathologies	
13:40	Fractures of the cranio-cervical junction - surgical treatment options	VV
13:55	Surgical treatment options in subaxial spine injuries	
14:10	Cervical trauma patient case discussion	
	Case1 - Lessons learned from an OC Fracture	
	Case2 - Lessons learned from an Odontoid fracture	
	Case3 - Lessons learned from a subaxial fracture in osteoporotic spine	
	Case4 - Lessons learned from a subaxial fracture in young adult	
	Case5 - Lessons learned from cervico thoracic fracture	VV

15:10	Break	
	T/L Pathologies	
15:30	The new AOspine classification for thoraco lumbar fractures	
15:45	Focus on TL burst fracture - stable, unstable? conservative treatment or surgery?	
16:00	Focus on TL burst fracture - hot or cold surgery? fusion or non fusion?	VV
16:15	Open or minimally invasive approach? What are the advantages for the patients in my daily practice?	
16:30	Thoraco lumbar trauma in the elderly population: are the treatment options different from young adults?	
16:45	TL Trauma patient case discussion	
	Case1 - Lessons learned from a burst fracture in young adult	
	Case2 - Lessons learned from a burst fracture in elderly patient	
	Case3 - Lessons learned from a post traumatic kyphosis	
	Case4 - Lessons learned from a polytrauma patient	
	Case5 - Lessons learned from a neurologic TL fracture	VV
18:00	Session end	
19:30	Dinner	

Friday, March 18th, 2016

07:30	Transfer to the lab and welcome coffee	
08:30	Rotation 1	
09:30	Rotation 2	
10:30	Break	
11:00	Rotation 3	
12:00	Rotation 4	
13:00	Lunch	
14:00	Bus departure to airport
